UX 5: Weekly Reconciliation UX 6: Excel Upload (Pro) UX 7: GSheets Sync (Business)
UX 8: Monthly Reconciliation Feature Tier Matrix OPS 1: Daily Rhythm OPS 2:
Support & Incidents OPS 3: Sense Check Gate

11 Additional Operational Gaps Identified in This Review

CRITICAL

OTP deliverability to Yahoo Mail PH — common among target users. Needs custom

SMTP with warmed-up domain (not Supabase default SendGrid).

CRITICAL

Webhook idempotency for Xendit — same payment webhook can fire twice on retry.

Handler must deduplicate by payment_id before processing.

CRITICAL

OR number generation legality — BIR requires sequentially numbered Official

Receipts from a registered OR series. Auto-generating receipt numbers needs legal sign-off before

Automated Self-Invoicing ships.

IMPORTANT**Dependency monitoring** — Anthropic API, Supabase, Xendit each need health

checks + graceful in-app fallback messages. Note: Claude Haiku Vision replaces Claude Haiku

Vision — single dependency instead of two.

IMPORTANT Data backup strategy — Supabase point-in-time recovery needs explicit

enablement on the paid plan + a tested restore procedure.

IMPORTANT Session expiry UX — graceful Taglish re-auth prompt when session expires mid-

use, not a raw error state.

IMPORTANT Incident response runbook — what happens at 2AM on a BIR deadline day when

the app goes down? Solo founder needs a written protocol even if it's just: detect → post status →

rollback → fix.

IMPORTANT Beta-to-paid transition — Phase 0C pilot users paying ₱99–₱199 need a defined

migration path when Phase 1 launches at ₱299. Loyalty rate? Auto-upgrade? No mention in

roadmap.

IMPORTANT PWA installation UX — no App Store listing means "Add to Home Screen" is non-

obvious. Landing page and onboarding need an explicit install guide step.

PLAN Admin observability — Anton needs a way to see: active users, MRR, feature usage

breakdown, Flag-as-Wrong queue. Even a Supabase dashboard + simple Retool view would suffice

for MVP.

PLAN Data retention policy — NPC requires a defined retention period for churned users. Must

be stated in Privacy Policy and enforced in the system (e.g., delete transactions after 1 year of

inactivity).

USER EXPERIENCE FLOWS

1

UX Flow 1 — Registration & Kilala Kita Onboarding

From first landing to Dashboard. Covers Auth (email OTP), Privacy & Terms, and all 5 Kilala Kita steps including BIR opt-in branches and 3-path data bootstrap.

Review focus: Does the BIR opt-in branch logic feel right? Are the 3 data bootstrap paths (Upload / GCash / Quick Start) in the right order? Should Terms acceptance happen before or after email verification?

flowchart TD
A([User visits projectka.ph]) --> B[Enter email address]

style BIR_A fill:#D5F5E3,stroke:#1E8449

Green path — registered BIR user

Orange path — informal seller, zero BIR features

Yellow path — unsure, soft education only

All paths merge at Data Bootstrap → AI Deepdive

UX Flow 2 — Daily Use Loop

Returning user from Dashboard through core feature interactions: receipt scanning, expense tracking, BIR deadlines (opt-in), and morning briefing. Includes AI loading states and error handling.

Review focus: Is the "Flag as Wrong" flow visible enough without being intrusive?

Should the duplicate receipt warning be a hard block or a soft confirm? Does the AI downtime fallback feel right?

Receipt Scanning — Tier Breakdown: Free tier has 0 receipt scans/month (no scanning capability). Pro tier unlocks 50 scans/month (covers receipts AND notebook photos). Business tier allows 80 scans/month (covers receipts AND notebook photos). Free-to-Pro upgrade is a key upsell trigger when receipt scanning is needed. This is a core monetization signal.

3

UX Flow 3 — Free → Pro Upgrade & Churn/Win-Back

Free tier limit hit, upgrade checkout, payment failure grace period, downgrade flow, and win-back email trigger. Includes the beta-to-paid transition path for Phase 0C pilot users.

Review focus: Is 3 days the right grace period before downgrading a Pro user who hasn't paid? Should pilot users (P99-P199) auto-upgrade to Pro or be asked first? Does the win-back trigger (BIR deadline approach) feel right or too pushy?

flowchart TD
FREE[Free User in App] --> LIMIT{Free limit hit?}

- **UAT Pre-Launch Phase:** Before public launch, 15–20 trusted testers receive access for 2–4 weeks. UAT uses a stripped stack: Supabase free + Cloudflare Pages free + Claude Haiku API only (no Sonnet, no Xendit, no WhatsApp Business API). Total UAT cost: ₱800.
- UAT users are not charged — they receive free access in exchange for structured feedback.
- UAT is a hard gate before Phase 1 public launch.

Pro user — full features active

Grace period — 3-day window to resolve payment

Downgraded — data preserved, access suspended

Beta pilot transition path

4

UX Flow 4 — Daily End-of-Day Check-In

All tiers, in-app only. Evening prompt to log daily sales and expenses in Taglish. Supports text entry, receipt photos (Pro), and notebook photos (Pro/Business).

□ **Design notes:** Language: Taglish throughout. Minimal fields — just total sales + total expenses (advanced breakdown optional). Completion target: 60 seconds. No push notifications in Phase 2; check-in only surfaces when app is opened.

flowchart TD
OPEN([User opens app in evening]) --> CHECK{Last check-in today?}

5

UX Flow 5 — Weekly Reconciliation Prompt

Every Friday evening, in-app. AKBai checks for missing daily entries and prompts user to fill gaps.

Includes quick-fill inputs and weekly summary confirmation.

□ **Trigger:** Friday evening (7–10 PM based on user timezone). Only shown if 1+ days missing in past 7 days. Completion target: ~5 minutes for full week.

flowchart TD
TRIGGER([Friday evening

Soft prompt — 1-2 days missing

Hard prompt — 3+ days missing

6

UX Flow 6 — Excel / CSV File Upload (Pro Tier)

Pro and Business users can import transaction data from Excel or CSV files. Includes column mapping, preview, deduplication, and fallback template link.

- Scope:** Accepts .xlsx and .csv files. Max file size: 5 MB. Deduplicates against existing entries using date + amount + vendor combo. Links to AKBai template (Google Sheets).

flowchart TD MENU([User in Pro settings\nTaps Import Data]) --> SELECT[Phone file picker:\nSelect .xlsx or .csv] SELECT --> FILE{File selected?} FILE -->|No| MENU FILE -->|Yes| PARSE[AKBai parses file] PARSE --> DETECT[Detects columns:\nDate · Amount · Vendor · Category] DETECT --> MAP[Column mapping UI:\nWhich column is Date?\nWhich is Amount?\nWhich is Vendor?] MAP --> PREVIEW[Shows first 5 rows preview\nConfirmation: Nakita ko ang X transactions] PREVIEW --> CONFIRM{Import?} CONFIRM -->|No| MENU CONFIRM -->|Yes| IMPORT[AKBai imports + deduplicates\nSkips any duplicates found] IMPORT --> SUCCESS{Import success?} SUCCESS -->|Yes| DONE[Success message:\nNa-import na ang X entries!\nGusto mo bang i-review?] DONE --> OPTIONS{Action?} OPTIONS -->|Review| REVIEW[Show imported entries\nUser can edit/delete as needed] OPTIONS -->|Continue| CONTINUE[Return to dashboard] SUCCESS -->|Error| ERROR[Error

7

UX Flow 7 — Google Sheets Live Sync (Business Tier, Phase 3)

Business tier users (M7+) can authorize AKBai to read their Google Sheets and auto-sync transactions.

Includes OAuth flow, template validation, and recurring sync status.

- **Scope:** Phase 3 feature (Month 7+). OAuth read-only scope. Auto-sync on each daily briefing generation. Requires Date + Amount + Category columns. Template link provided if columns missing.

flowchart TD

8

UX Flow 8 — Monthly Reconciliation & Summary

Last day of month. AKBai shows month-end summary, asks for corrections, and provides export/share options. All tiers, in-app.

- **Timing:** Triggered on app open on the last calendar day of the month. Shows: total sales, total expenses, net profit, top 3 expense categories. Share to WhatsApp available
- M7+ only.

```
flowchart TD
    TRIGGER([Last day of month\nUser opens app]) --> MODAL[AKBai modal:\nMonth-end na!\nLet's review your [Month] summary]

Feature Tier Matrix

Comprehensive feature breakdown across Free, Pro, and Business tiers. Updated with new UX flows and capability additions.

Feature / Capability	Free	Pro (P299-P399/mo)	Business (P799-P999/mo, M7+)
Daily Check-In (Taglish)	Yes (text only)	Yes (text + photo upload)	Yes (text + photo + auto-note from GSheets)
Morning Briefing	Teaser only	Full AI briefing	Full AI briefing + prioritization
Receipt Scanning (OCR)	No (0 scans/month)	Yes (50 scans/month, covers receipts + notebook photos)	Yes (80 scans/month, covers receipts + notebook photos)
Notebook Photo OCR	No	Yes (from 50-scan pool)	Yes (from 80-scan pool)
Chat with AKBai	10 messages/day (rate limited)	Unlimited	Unlimited
BIR Integration (if bir_opt_in=true)	Soft alerts only	Full: Deadline Watcher + Tanong Kay BIR	Full: Deadline Watcher + Tanong Kay BIR
Saan Napunta? (Expense Breakdown)	Basic view	Full with categories + trends	Full with categories + trends

Feature / Capability	Free	Pro (P299-P399/mo)	Business (P799-P999/mo, M7+)
Weekly Reconciliation Prompt	Yes (all tiers)	Yes (all tiers)	Yes (all tiers)
Monthly Summary Card	Yes (basic)	Yes (full with categories)	Yes (full with categories)
Excel / CSV Import	No	Yes (with column mapping)	Yes (with column mapping)
Google Sheets Template	Download only	Download + re-upload back	Live sync (auto-read on briefing generation)
GSheets Live Sync	No	No	Yes (M7+, read-only, auto-sync)
PDF Export (Monthly / Weekly)	No	Yes	Yes
Share to WhatsApp	No	No	Yes (M7+ only, share summary snapshots)
Data Retention	Full access while active	Full access while active	Full access while active
Support	Community FAQ	Email + WhatsApp support	Priority WhatsApp + dedicated support

Notes:

- **Scan Pool Coverage:** Pro and Business scan pools cover both receipt photos AND notebook/handwritten note photos. The pool is shared across all scan types.
- **M7+ (Month 7+):** Business tier features marked "M7+" launch in Phase 3 (Month 7) and include Google Sheets live sync and WhatsApp sharing.
- **GSheets Sync:** Business tier only. Requires read-only OAuth authorization. Auto-syncs on daily briefing generation. Validates required columns (Date, Amount, Category).
- **BIR Features:** Only shown to users with bir_opt_in=true. Informal sellers (bir_opt_in=false) see zero BIR-related features.

OPS Flow 1 — Anton's Daily & Weekly Operating Rhythm

What Anton checks, when, and what decisions get made. Designed as a sustainable solo rhythm — total active time per week is estimated for each loop.

Review focus: Does this weekly rhythm feel manageable as a solo founder alongside a day job? Are there tasks here you'd want to delegate to a VA? Should the BIR calendar review be weekly or can it be monthly?

Compliance Note: NPC (Non-Profit Cooperative) registration is required pre-launch before Phase 1 public launch. This is a hard gate and must be completed during Phase 0C pilot. Budget: ₱10,000 for registration and compliance setup.

Unit Economics: Pro LTV: ₱7,475 · Blended CAC: ₱110 · LTV/CAC ratio: 68x · Payback period: 0.4 months (12 days)

```

- Hosting: Vercel free (M1-6) → Cloudflare Pages ₱286/month (M7+)
- Database: Supabase free (M1-9) → Supabase Pro ₱1,430/month (M10+)
- WhatsApp: M1-M6 support uses personal WhatsApp with AKBai business name · M7+ switches to WhatsApp Business API ₱572/month
- Monitoring: Free tiers (PostHog, Sentry) maintained through Y3
- Pro Pricing Roadmap: Y1 ₱299/mo → Y2 ₱349/mo → Y3 ₱399/mo
- Business Tier Launch: Phase 2 / Month 13 (Y1 ₱799/mo → Y2 ₱899/mo → Y3 ₱999/mo, with 80 receipt scans/month)

OPS Flow 2 — Support Escalation & Incident Response

From user contact (WhatsApp/Viber) through triage, resolution, and postmortem. Includes the incident runbook for production outages — designed for a solo founder with no on-call team.

Review focus: For a P0 outage — are you comfortable with "post a status update to users then fix"? Should there be a simple status page (statuspage.io has a free tier)? Is the 24-hour trust incident response SLA achievable solo?

```

P0 Critical — immediate response, rollback available

Trust incident — 24h personal response SLA

12

OPS Flow 3 — MVP Sense Check Gate (Day 30-60)

The formal go/no-go decision process between Phase 1 and Phase 2. Three possible outcomes: proceed, iterate MVP, or return to discovery. Includes the Sense Check Memo deliverable.

Review focus: Are the gate thresholds realistic? Day 7 retention $\geq 40\%$ is ambitious for a new app — do you want to adjust? Should you share the Sense Check Memo with anyone beyond the co-founder?

```

flowchart TD
    TRIGGER([Day 30-60 post-MVP launch  
Sense Check triggered]) --> PULL[Pull data from PostHog / Mixpanel]

    style DISCOVERY fill:#F4ECF7,stroke:#7D3C98
  
```

GREEN — proceed to Phase 2

YELLOW — iterate MVP 2–4 weeks, then re-gate

RED — do not proceed, return to discovery

Review Checklist — Before Incorporating into v4 Roadmap

☐ UX Flow 1: BIR opt-in branch logic confirmed

☐ UX Flow 1: Data bootstrap path order confirmed

☐ UX Flow 1: Terms acceptance timing confirmed

☐ UX Flow 2: Updated scan counts (50 Pro / 80 Business) confirmed

☐ UX Flow 2: Flag-as-Wrong visibility confirmed

☐ UX Flow 3: Grace period (3 days) confirmed

☐ UX Flow 3: Beta-to-paid transition rate/approach confirmed

☐ UX Flow 4: Daily check-in Taglish language confirmed

☐ UX Flow 5: Weekly reconciliation prompt timing confirmed

☐ UX Flow 6: Excel import column mapping logic confirmed

☐ UX Flow 7: GSheets OAuth scope and template requirements confirmed

☐ UX Flow 8: Month-end summary design and export options confirmed

☐ Tier Matrix: All feature allocations across tiers confirmed

☐ OPS Flow 1: Weekly rhythm is sustainable confirmed

☐ OPS Flow 2: 24h trust incident SLA confirmed

☐ OPS Flow 2: Status page decision (yes/no)

☐ OPS Flow 3: Sense Check thresholds confirmed

☐ All 11 additional gaps reviewed and addressed
