Ang pangalan ay may kahulugan.

AKBai comes from a Filipino word with deep meaning. "Akbay" means to put an arm around someone's shoulder, to walk beside them, to accompany. Combined with "AI," it represents something powerful: not a tool that replaces you, but a partner that walks with you every step of your business journey.

Hindi lang software. Kaakbay.

In a world of cold, corporate AI solutions, we chose a name that speaks to the heart. AKBai exists to lighten your load, to be there when you need support, and to help you succeed — not by replacing your judgment, but by amplifying your ability to lead.

VISION

To be the most trusted AI partner for Filipino entrepreneurs, enabling them to compete globally while staying true to their values.

MISSION

To provide intelligent, human-centered business solutions that understand Filipino business culture and empower entrepreneurs to scale with confidence.

Brand Promise

"Mas maraming oras para sa negosyo.
Mas kaunting oras sa admin."

Core Values

Tiwala (Trust)

We earn trust through transparency, security, and consistent delivery. Your data is sacred.

Malasakit (Care)

We genuinely care about your success. Your wins are our wins. We listen and adapt.

Kahusayan (Excellence)

We sweat the details. Quality is non-negotiable. We constantly improve.

The Mark — Meet Kai

Logo Anatomy

The AKBai logo mark is a yin-yang inspired circular form featuring **Kai's smiling face** — the AI persona — at its center. The light variant on cream is the primary logo used across all key brand touchpoints.

Three Components

1

Circular Mark

A yin-yang inspired form with Kai's integrated smiling face. Rendered in Warm Honey gradient (#F59E0B to #D97706) on light backgrounds, full-color on dark, or white + light grey on honey/gradients backgrounds.

2

Kai's Face

Two curved happy eyes and a gentle smile arc at the center. This is the primary visual element — it transforms the logo from an abstract shape into a character users connect with emotionally.

3

Wordmark

"AKB" in on-surface color (#1c1c18 light / #e6e2db dark) + "ai" in primary-container (#f59e0b). Plus Jakarta Sans, ExtraBold 800.

Minimum Size & Clear Space

MINIMUM SIZE

24px for favicon, 48px for app icon, 64px for UI avatar

CLEAR SPACE

Half the mark's radius on all sides

Logo Lockups

Primary Lockup (Default)

The main logo. Use on cream or white backgrounds.

Stacked

Mark above wordmark for narrow or square layouts.

Dark Background

Alternate variant for dark backgrounds.

Reversed (Honey)

Alternate variant for honey or colored backgrounds.

Logo Rules

DO

- ✓ Use on approved backgrounds (dark navy, cream, white, honey, or brand gradient)
- ✓ Maintain minimum 24px size for legibility
- ✓ Keep clear space of half the mark's radius on all sides
- ✓ Kai's face must always be visible — never crop or obscure it

DON'T

- ✗ Stretch, squeeze, or distort the logo
- ✗ Remove Kai's face from the mark for any application
- ✗ Change the colors — use official hex values only
- ✗ Place on clashing or low-contrast backgrounds
- ✗ Rotate the wordmark (mark orientation is fixed)

Approved Background Examples

Color Palette

 Aa	 Aa	 Aa
Ink #07101e 60% usage	Warm Honey #F59E0B 25% usage	Teal #20C9A0 10% usage
 Card #0d1a2e Secondary dark background, cards	 Honey Deep #D97706 Gradient end, hover states	 White #FFFFFF Text on dark, clean backgrounds
 Warm Cream #FEFAF3 Page background, card backgrounds	 Muted #8A9BB5 Secondary text, labels, captions	 Warm Card #FFF8ED Card highlights, subtle backgrounds

Color Balance & Usage

Color Balance

Ink dominates to create a grounded, premium feel. Honey draws the eye to actions and highlights. Teal is used sparingly for success states and secondary accents. Neutrals fill the gaps.

Contrast Combinations

DO

- ✓ **Honey on Ink** — High contrast, primary CTA
- ✓ **White on Card** — Maximum contrast for body text
- ✓ **White on Ink** — Clean dark-mode text

DON'T

- ✗ **Muted on Cream** — Poor contrast ratio
- ✗ **Teal on Cream** — Insufficient contrast
- ✗ **White on Honey** — Fails WCAG AA

Usage by Role

Primary Text	Ink on light, White on dark
CTA / Accent	Warm Honey (#F59E0B)
Success States	Teal (#20C9A0)
Backgrounds	Ink (dark), Warm Cream (light)
Secondary Text	Muted (#8A9BB5)

Plus Jakarta Sans

Geometric clarity with warm, human character. Our single typeface handles everything from display headlines to UI labels.

Jobs-to-be-Done

Our personas share common needs. These are the functional and emotional jobs they hire AKBai to do.

"When I'm drowning in paperwork, I want a smart system to handle them automatically, so I can focus on building my business."

"When I'm unsure if I'm making money, I want clear visibility into my finances, so I can make confident decisions."

"When I want to scale but worry about complexity, I want a partner who grows with me."

What They All Have in Common

- They are hardworking Filipino entrepreneurs running real businesses
- They spend too much time on admin and not enough on growth
- They need a partner, not another tool to learn
- They value trust, honesty, and real results over flashy features
- They want to be treated with respect, not talked down to

Subject Line Formulas

Question-Based

"Alam mo ba kung magkano ang kita mo this month?"

Benefit-Driven

"Save 3 hours a day on invoicing"

Curiosity

"Maria saved P15k last month. Here's how."

Email Voice Rules

DO

- ✓ Write like you're texting a friend who asked for advice
- ✓ Use their name. Reference their business type.
- ✓ Keep paragraphs short — 2-3 sentences max

DON'T

- ✗ Use "Dear Valued Customer" or corporate greetings
- ✗ Write walls of text — break it up
- ✗ Hard-sell or use pressure tactics

Design Philosophy

Warm, Not Tech.

Warm

- Honey accents that draw the eye naturally
- Cream backgrounds that feel inviting
- Rounded corners that soften every edge
- Taglish copy that speaks their language

Not

- Gray palettes that feel cold and corporate
- Harsh lines and sharp edges
- Stock photos of generic office workers
- English-only interfaces

Five UI Principles

01

Warm Backgrounds

Cream, soft whites. Never cold gray.

02

Rounded Corners

8-12px border-radius on all elements.

03

Amber Glow

Subtle honey-tinted shadows.

04

Taglish Copy

UI labels in natural Taglish.

05

Real Filipino Imagery

Actual Filipino faces, not stock.

UI Guidelines

Component Styling

BUTTONS

Rounded (8px radius), honey fill for primary, ghost for secondary. 44px minimum touch target for mobile.

INPUTS

8px radius, subtle cream background, honey focus ring. Placeholder text in Muted (#8A9BB5).

CARDS

12px radius, warm-card background (#FFF8ED), ambient shadow instead of borders. Tonal layering over lines.

NAVIGATION

Bottom nav for mobile. Honey active indicator. Icons with Taglish labels where space permits.

Shadows & Elevation

Use tonal layering and ambient shadows instead of borders. The **No-Line Rule** creates a softer, warmer visual hierarchy.
